A comprehensive history of Australian Aboriginal whaling and sealing.

For most Australian Aboriginal people, the impact of colonialism was blunt—dispossession, dislocation, disease, murder, and missionization. Yet there is another story of Australian history that has remained untold, a story of enterprise and entrepreneurship, of Aboriginal people seizing the opportunity to profit from life at sea as whalers and sealers. In some cases participation was voluntary; in others it was more invidious and involved kidnapping and trade in women. In many cases, the individuals maintained and exercised a degree of personal autonomy and agency within their new circumstances. This book explores some of their lives and adventures by analyzing archival records of maritime industry, captains' logs, ships' records, and the journals of the sailors themselves, among other artifacts. Much of what is known about this period comes from the writings of Herman Melville, and in this book Melville's whaling novels act as a prism through which relations aboard ships are understood. Drawing on both history and literature, *Roving Mariners* provides a comprehensive history of Australian Aboriginal whaling and sealing.

“This engaging investigation into the lives of Aboriginal workers adds to our understanding of how labor, gender, and indigeneity interacted in the early decades of settler colonialism. What makes these particular Aboriginal peoples unique and interesting is how they traveled as part of an industrial workforce, not necessarily as slaves or servants to whites, but in a niche economy that gave them unusual opportunities and positioned them in relationships with whites that were different from how we usually conceptualize Indigenous-European relations in the nineteenth century. This is a fine book.” — Nancy Shoemaker, author of *A Strange Likeness: Becoming Red and White in Eighteenth-Century North America*
