Building a Recommendation System with R

Suresh K. Gorakala, Michele Usuelli

Building a Recommendation System with R Suresh K. Gorakala, Michele Usuelli

Learn the art of building robust and powerful recommendation engines using R

About This Book

- Learn to exploit various data mining techniques
- Understand some of the most popular recommendation techniques
- This is a step-by-step guide full of real-world examples to help you build and optimize recommendation engines

Who This Book Is For

If you are a competent developer with some knowledge of machine learning and R, and want to further enhance your skills to build recommendation systems, then this book is for you.

What You Will Learn

- Get to grips with the most important branches of recommendation
- Understand various data processing and data mining techniques
- Evaluate and optimize the recommendation algorithms
- Prepare and structure the data before building models
- Discover different recommender systems along with their implementation in R
- Explore various evaluation techniques used in recommender systems
- Get to know about recommenderlab, an R package, and understand how to optimize it to build efficient recommendation systems

In Detail

A recommendation system performs extensive data analysis in order to generate suggestions to its users about what might interest them. R has recently become one of the most popular programming languages for the data analysis. Its structure allows you to interactively explore the data and its modules contain the most cutting-edge techniques thanks to its wide international community. This distinctive feature of the R language makes it a preferred choice for developers who are looking to build recommendation systems.

The book will help you understand how to build recommender systems using R. It starts off by explaining the basics of data mining and machine learning. Next, you will be familiarized with how to build and optimize recommender models using R. Following that, you will be given an overview of the most popular recommendation techniques. Finally, you will learn to implement all the concepts you have learned throughout the book to build a recommender system.

Style and approach

This is a step-by-step guide that will take you through a series of core tasks. Every task is explained in detail with the help of practical examples.

From reader reviews:

Brandon Harmon:

The book Building a Recommendation System with R gives you the sense of being enjoy for your spare time. You should use to make your capable a lot more increase. Book can for being your best friend when you getting anxiety or having big problem with your subject. If you can make examining a book Building a Recommendation System with R to become your habit, you can get much more advantages, like add your capable, increase your knowledge about a few or all subjects. You can know everything if you like wide open and read a publication Building a Recommendation System with R. Kinds of book are a lot of. It means that, science reserve or encyclopedia or others. So , how do you think about this e-book?

Alfred Greenwell:

Hey guys, do you would like to finds a new book to learn? May be the book with the headline Building a Recommendation System with R suitable to you? Often the book was written by famous writer in this era. Typically the book untitled Building a Recommendation System with Ris the main one of several books this everyone read now. This kind of book was inspired many men and women in the world. When you read this guide you will enter the new dimensions that you ever know ahead of. The author explained their plan in the simple way, and so all of people can easily to understand the core of this guide. This book will give you a great deal of information about this world now. To help you see the represented of the world on this book.

Shirley Wales:

Reading a book tends to be new life style within this era globalization. With reading through you can get a lot of information that could give you benefit in your life. With book everyone in this world could share their idea. Guides can also inspire a lot of people. Many author can inspire their reader with their story as well as their experience. Not only the story that share in the ebooks. But also they write about the knowledge about something that you need illustration. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors in this world always try to improve their expertise in writing, they also doing some exploration before they write with their book. One of them is this Building a Recommendation System with R.

Delmar Stingley:

Beside this particular Building a Recommendation System with R in your phone, it may give you a way to get nearer to the new knowledge or data. The information and the knowledge you might got here is fresh in the oven so don't possibly be worry if you feel like an aged people live in narrow community. It is good thing to have Building a Recommendation System with R because this book offers for you readable information. Do you sometimes have book but you don't get what it's facts concerning. Oh come on, that will not happen if you have this in the hand. The Enjoyable set up here cannot be questionable, just like treasuring beautiful island. So do you still want to miss this? Find this book in addition to read it from currently!
