Multi-source, Multilingual Information Extraction and Summarization (Theory and Applications of Natural Language Processing)

Multi-source, Multilingual Information Extraction and Summarization (Theory and Applications of Natural Language Processing)

Information extraction (IE) and text summarization (TS) are powerful technologies for finding relevant pieces of information in text and presenting them to the user in condensed form. The ongoing information explosion makes IE and TS critical for successful functioning within the information society.

These technologies face particular challenges due to the inherent multi-source nature of the information explosion. The technologies must now handle not isolated texts or individual narratives, but rather large-scale repositories and streams---in general, in multiple languages---containing a multiplicity of perspectives, opinions, or commentaries on particular topics, entities or events. There is thus a need to adapt existing techniques and develop new ones to deal with these challenges.

This volume contains a selection of papers that present a variety of methodologies for content identification and extraction, as well as for content fusion and regeneration. The chapters cover various aspects of the challenges, depending on the nature of the information sought---names vs. events,--- and the nature of the sources---news streams vs. image captions vs. scientific research papers, etc. This volume aims to offer a broad and representative sample of studies from this very active research field.

From reader reviews:

Erica Dennis:

Book is to be different for each and every grade. Book for children until eventually adult are different content. To be sure that book is very important normally. The book Multi-source, Multilingual Information Extraction and Summarization (Theory and Applications of Natural Language Processing) seemed to be making you to know about other know-how and of course you can take more information. It is rather advantages for you. The reserve Multi-source, Multilingual Information Extraction and Summarization (Theory and Applications of Natural Language Processing) is not only giving you more new information but also to be your friend when you truly feel bored. You can spend your spend time to read your book. Try to make relationship with all the book Multi-source, Multilingual Information Extraction and Summarization (Theory and Applications of Natural Language Processing). You never really feel lose out for everything should you read some books.

Jose Holmes:

Information is provisions for individuals to get better life, information nowadays can get by anyone with everywhere. The information can be a expertise or any news even restricted. What people must be consider while those information which is inside the former life are hard to be find than now could be taking seriously which one is suitable to believe or which one the particular resource are convinced. If you obtain the unstable resource then you obtain it as your main information you will have huge disadvantage for you. All those possibilities will not happen with you if you take Multi-source, Multilingual Information Extraction and Summarization (Theory and Applications of Natural Language Processing) as your daily resource information.

Michael Patterson:

Reading a reserve can be one of a lot of action that everyone in the world likes. Do you like reading book and so. There are a lot of reasons why people enjoy it. First reading a e-book will give you a lot of new information. When you read a reserve you will get new information since book is one of many ways to share the information or perhaps their idea. Second, examining a book will make an individual more imaginative. When you looking at a book especially fiction book the author will bring that you imagine the story how the characters do it anything. Third, you could share your knowledge to other people. When you read this Multi-source, Multilingual Information Extraction and Summarization (Theory and Applications of Natural Language Processing), you may tells your family, friends in addition to soon about yours e-book. Your knowledge can inspire different ones, make them reading a reserve.

Cheryl Edgerly:

Publication is one of source of know-how. We can add our information from it. Not only for students but in addition native or citizen want book to know the up-date information of year to year. As we know those

textbooks have many advantages. Beside we add our knowledge, could also bring us to around the world. With the book Multi-source, Multilingual Information Extraction and Summarization (Theory and Applications of Natural Language Processing) we can have more advantage. Don't you to definitely be creative people? For being creative person must choose to read a book. Simply choose the best book that suitable with your aim. Don't end up being doubt to change your life by this book Multi-source, Multilingual Information Extraction and Summarization (Theory and Applications of Natural Language Processing). You can more pleasing than now.
