Toward Zero Discharge: Innovative Methodology and Technologies for Process Pollution Prevention

Toward Zero Discharge: Innovative Methodology and Technologies for Process Pollution Prevention

This book discusses pathways to achieve pollution prevention and waste minimization at the sources leading toward zero discharge. Coverage includes life cycle assessment, industrial ecology, eco-industrial parks, green engineering, and sustainable chemical and allied processes and products development. The pulp and paper industry is introduced as a case study in demonstrating how this industry is achieving pollution prevention goals by various techniques, and how this industry has become a minimum impact industry, moving towards achieving zero discharge status in most process areas.

Featuring a collection of expert authors, this book is essential reading for industrial ecologists and engineers, material scientists, and state and federal officials.
