## **Municipal Policing in the European Union: Comparative Perspectives (Crime Prevention and Security Management) Daniel Donnelly**

In the past, defining municipal policing was easier as it incorporated local authority duties, crime prevention and police patrol. However in the contemporary setting, police resources are regularly overstretched and novel ways of alleviating their workloads are continually being sought. One method of achieving this goal is by involving other people and technology to assist the police in their everyday tasks. A system of partnership and technology, underpinned by legislation, has made this ambition possible. This book reviews how traditional municipal policing has evolved in a number of European Union countries discussing topics such as history, police civilianization, police auxiliaries, community policing, surveillance, politics and governance, with predictions as to what may lie ahead for municipal policing in the EU. Municipal Policing in Europe provides an exclusive vista of the evolving model of local policing in the EU member states at a time when police forces are increasingly collaborating together.
