Make an Arduino-Controlled Robot (Make: Projects)

Michael Margolis

Make an Arduino-Controlled Robot (Make: Projects) Michael Margolis

Building robots that sense and interact with their environment used to be tricky. Now, Arduino makes it easy. With this book and an Arduino microcontroller and software creation environment, you'll learn how to build and program a robot that can roam around, sense its environment, and perform a wide variety of tasks. All you to get started with the fun projects is a little programming experience and a keen interest in electronics.

Make a robot that obeys your every command—or runs on its own.

Maybe you're a teacher who wants to show students how to build devices that can move, sense, respond, and interact with the physical world. Or perhaps you're a hobbyist looking for a robot companion to make your world a little more futuristic. With *Make an Arduino Controlled Robot*, you'll learn how to build and customize smart robots on wheels.

You will:

- Explore robotics concepts like movement, obstacle detection, sensors, and remote control
- Use Arduino to build two- and four-wheeled robots
- Put your robot in motion with motor shields, servos, and DC motors
- Work with distance sensors, infrared reflectance sensors, and remote control receivers
- Understand how to program your robot to take on all kinds of real-world physical challenges

From reader reviews:

Anthony Jarrard:

Inside other case, little individuals like to read book Make an Arduino-Controlled Robot (Make: Projects). You can choose the best book if you want reading a book. As long as we know about how is important some sort of book Make an Arduino-Controlled Robot (Make: Projects). You can add expertise and of course you can around the world by way of a book. Absolutely right, mainly because from book you can realize everything! From your country till foreign or abroad you will find yourself known. About simple factor until wonderful thing you can know that. In this era, you can open a book as well as searching by internet device. It is called e-book. You need to use it when you feel uninterested to go to the library. Let's learn.

Bernard Walker:

Book is to be different for every grade. Book for children right up until adult are different content. As you may know that book is very important for people. The book Make an Arduino-Controlled Robot (Make: Projects) has been making you to know about other knowledge and of course you can take more information. It is extremely advantages for you. The guide Make an Arduino-Controlled Robot (Make: Projects) is not only giving you far more new information but also being your friend when you truly feel bored. You can spend your spend time to read your e-book. Try to make relationship together with the book Make an Arduino-Controlled Robot (Make: Projects). You never experience lose out for everything should you read some books.

Jesse Ward:

As people who live in the modest era should be revise about what going on or data even knowledge to make them keep up with the era and that is always change and move ahead. Some of you maybe will certainly update themselves by studying books. It is a good choice for you but the problems coming to a person is you don't know what one you should start with. This Make an Arduino-Controlled Robot (Make: Projects) is our recommendation to make you keep up with the world. Why, as this book serves what you want and want in this era.

Orville Hightower:

Make an Arduino-Controlled Robot (Make: Projects) can be one of your basic books that are good idea. Most of us recommend that straight away because this guide has good vocabulary that will increase your knowledge in language, easy to understand, bit entertaining but nevertheless delivering the information. The writer giving his/her effort to get every word into joy arrangement in writing Make an Arduino-Controlled Robot (Make: Projects) however doesn't forget the main position, giving the reader the hottest and also based confirm resource information that maybe you can be considered one of it. This great information may drawn you into fresh stage of crucial imagining.
