Signals and Systems with MATLAB

Won Y. Yang

Signals and Systems with MATLAB Won Y. Yang

This book is primarily intended for junior-level students who take the courses on 'signals and systems'. It may be useful as a reference text for practicing engineers and scientists who want to acquire some of the concepts required for signal processing. The readers are assumed to know the basics about linear algebra, calculus (on complex numbers, differentiation, and integration), differential equations, Laplace transform, and MATLAB. Some knowledge about circuit systems will be helpful. Knowledge in signals and systems is crucial to students majoring in Electrical Engineering. The main objective of this book is to make the readers prepared for studying advanced subjects on signal processing, communication, and control by covering from the basic concepts of signals and systems to manual-like introductions of how to use the MATLAB and Simulink tools for signal analysis and filter design. The features of this book can be summarized as follows: 1. It not only introduces the four Fourier analysis tools, CTFS (continuous-time Fourier series), CTFT (continuous-time Fourier transform), DFT (discrete-time Fourier transform), and DTFS (discrete-time Fourier series), but also illuminates the relationship among them so that the readers can realize why only the DFT of the four tools is used for practical spectral analysis and why/how it differs from the other ones, and further, think about how to reduce the difference to get better information about the spectral characteristics of signals from the DFT analysis.

From reader reviews:

Randall James:

Book is to be different per grade. Book for children until eventually adult are different content. As you may know that book is very important normally. The book Signals and Systems with MATLAB had been making you to know about other understanding and of course you can take more information. It is extremely advantages for you. The reserve Signals and Systems with MATLAB is not only giving you a lot more new information but also for being your friend when you experience bored. You can spend your own spend time to read your book. Try to make relationship with all the book Signals and Systems with MATLAB. You never truly feel lose out for everything in case you read some books.

Tia Sargent:

This book untitled Signals and Systems with MATLAB to be one of several books in which best seller in this year, that's because when you read this e-book you can get a lot of benefit in it. You will easily to buy that book in the book retail outlet or you can order it by way of online. The publisher of this book sells the e-book too. It makes you quickly to read this book, because you can read this book in your Cell phone. So there is no reason to you personally to past this e-book from your list.

David Burch:

You can find this Signals and Systems with MATLAB by go to the bookstore or Mall. Only viewing or reviewing it might to be your solve trouble if you get difficulties for ones knowledge. Kinds of this guide are various. Not only through written or printed but also can you enjoy this book through e-book. In the modern era such as now, you just looking of your mobile phone and searching what your problem. Right now, choose your current ways to get more information about your reserve. It is most important to arrange you to ultimately make your knowledge are still revise. Let's try to choose appropriate ways for you.

Dawn Nelson:

Do you like reading a reserve? Confuse to looking for your best book? Or your book ended up being rare? Why so many concern for the book? But any people feel that they enjoy regarding reading. Some people likes examining, not only science book but novel and Signals and Systems with MATLAB or maybe others sources were given knowledge for you. After you know how the good a book, you feel desire to read more and more. Science guide was created for teacher as well as students especially. Those books are helping them to include their knowledge. In some other case, beside science reserve, any other book likes Signals and Systems with MATLAB to make your spare time more colorful. Many types of book like here.
