How to STEM: Science, Technology, Engineering, and Math Education in Libraries

How to STEM: Science, Technology, Engineering, and Math Education in Libraries

During the past few years, groups like the President's Council of Advisors on Science and Technology, Center for Education have been placing great emphasis on the significance of STEM (science, technology, engineering, and math) education. In brief, the US is seen as falling behind the rest of the world in science and technology education. In response, the curricula have been revised in many educational institutions and school districts across the country. It is clear that for STEM to be successful, other community organizations, most particularly libraries, need to be closely involved in the process. Library staff realize the importance of getting involved in STEM education, but many have difficulty finding comprehensive information that will help them plan and successfully implement STEM direction in their organization. This book is designed to meet that need. It is timely and relevant. *How to STEM: Science, Technology, Engineering, and Math Education in Libraries* is by and for libraries who are involved in contributing efforts into advancing these subjects. It is organized in 9 parts including funding, grant writing, community partnerships, outreach, research, and examples of specific programming activities. Authors are drawn from the professional staffs of educational institutions, libraries, and non-profit organizations such as science museums.

The book contains eight parts, each emphasizing a different aspect of how to succeed with STEM. Part 1 emphasizes how hands-on activities that are both fun and educational can be used to further STEM awareness. Parts 2 and 3 contain chapters on the uniting of STEM with Information Literacy. Innovative collection development ideas are discussed in Part 4 and Part 5 focuses on research and publishing. Outreach is the theme of Part 6 and the programs described in these chapters offer an array of ways to connect with students of all ages. The final section of *How to STEM: Science, Technology, Engineering, and Math Education in Libraries* addresses the funding of these programs.

Librarians of all types will be pleased to discover easy-to-implement suggestions for collaborative efforts, many rich and diverse programming ideas, strategies for improving reference services and library instruction to speakers of English as a second language, marketing and promotional tips designed to welcome multicultural patrons into the library, and much more.

From reader reviews:

Elizabeth Parker:

Throughout other case, little folks like to read book How to STEM: Science, Technology, Engineering, and Math Education in Libraries. You can choose the best book if you want reading a book. Providing we know about how is important a book How to STEM: Science, Technology, Engineering, and Math Education in Libraries. You can add know-how and of course you can around the world by the book. Absolutely right, simply because from book you can know everything! From your country until foreign or abroad you will find yourself known. About simple thing until wonderful thing you can know that. In this era, we can easily open a book or even searching by internet product. It is called e-book. You need to use it when you feel weary to go to the library. Let's go through.

Carol Johnson:

Reading a book can be one of a lot of exercise that everyone in the world enjoys. Do you like reading book thus. There are a lot of reasons why people enjoyed. First reading a reserve will give you a lot of new facts. When you read a reserve you will get new information since book is one of many ways to share the information or perhaps their idea. Second, reading through a book will make you actually more imaginative. When you reading through a book especially fictional works book the author will bring you to definitely imagine the story how the personas do it anything. Third, you may share your knowledge to some others. When you read this How to STEM: Science, Technology, Engineering, and Math Education in Libraries, you are able to tells your family, friends in addition to soon about yours e-book. Your knowledge can inspire others, make them reading a book.

Ian Hall:

Exactly why? Because this How to STEM: Science, Technology, Engineering, and Math Education in Libraries is an unordinary book that the inside of the reserve waiting for you to snap the item but latter it will shock you with the secret it inside. Reading this book close to it was fantastic author who write the book in such awesome way makes the content within easier to understand, entertaining approach but still convey the meaning thoroughly. So , it is good for you for not hesitating having this anymore or you going to regret it. This excellent book will give you a lot of advantages than the other book have got such as help improving your proficiency and your critical thinking way. So , still want to delay having that book? If I had been you I will go to the reserve store hurriedly.

Abigail Shelton:

As a university student exactly feel bored to reading. If their teacher questioned them to go to the library in order to make summary for some guide, they are complained. Just little students that has reading's heart and soul or real their passion. They just do what the instructor want, like asked to go to the library. They go to at this time there but nothing reading seriously. Any students feel that reading through is not important, boring

and can't see colorful images on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this How to STEM: Science, Technology, Engineering, and Math Education in Libraries can make you experience more interested to read.
