New Directions in Social Impact Assessment: Conceptual and Methodological Advances

Frank Vanclay, Ana Maria Esteves

New Directions in Social Impact Assessment: Conceptual and Methodological Advances Frank Vanclay, Ana Maria Esteves

'This book should be read by anyone commissioning impact assessments who wants to build their understanding of the more progressive and innovative end of the topic. A job well done in the eyes of stakeholders and regulators requires proper social analysis.'

- Jon Samuel, Head of Social Performance, Anglo American

'The list of authors reads like a who's who in SIA. Academics and practitioners are equally represented among the authors. The book provides a good mix of broad theoretical concepts and specific practical topics.'

- Martin Haeefe, Manager, Environmental Impact Assessment at Mackenzie Valley Environmental Impact Review Board, Yellowknife, Northwest Territories, Canada

'This book gives a very broad overview of where Social Impact Assessment is coming from, where it is now and where it could go: from an impact assessment tool to an impact management tool. It provides a realistic insight in both the achievements and the struggles of Social Impact Assessment. A recommended read for both those interested in Social Impact Assessment and those in related domains where social issues are gaining increasing importance, such as Environmental Assessment and Sustainability Appraisal.'

- Rob Verheem, Deputy Director, Netherlands Commission for Environmental Assessment

This important new book outlines current developments in thinking in the field of Social Impact Assessment (SIA). It advances the theory and practice of SIA, and argues that a dramatic shift is required in the way socioeconomic studies and community participation is undertaken. The book emphasizes that, much more than the act of predicting impacts in a regulatory context, SIA needs to be the process of managing the social aspects of development and that there needs to be a holistic and integrated approach to impact assessment. It stresses that greater attention needs to be given to ensuring that the goals of development are attained and enhanced.

This significant addition to the literature will be an invaluable reference for academics, consultants and practitioners.

Edward Doucet:

Is it an individual who having spare time after that spend it whole day by simply watching television programs or just lying on the bed? Do you need something new? This New Directions in Social Impact Assessment: Conceptual and Methodological Advances can be the solution, oh how comes? The new book you know. You are thus out of date, spending your extra time by reading in this brand new era is common not a geek activity. So what these publications have than the others?

Marcella Cook:

As a pupil exactly feel bored to reading. If their teacher inquired them to go to the library or even make summary for some book, they are complained. Just very little students that has reading's heart or real their pastime. They just do what the instructor want, like asked to go to the library. They go to right now there but nothing reading very seriously. Any students feel that reading through is not important, boring along with can't see colorful images on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this New Directions in Social Impact Assessment: Conceptual and Methodological Advances can make you truly feel more interested to read.
