**Barkley Deficits in Executive Functioning Scale--Children and Adolescents (BDEFS-CA)** Russell A. Barkley PhD ABPP ABCN

The Barkley Deficits in Executive Functioning Scale--Children and Adolescents (BDEFS-CA) is an empirically based tool for evaluating clinically significant dimensions of child and adolescent executive functioning. Evidence indicates that the BDEFS-CA is far more predictive of impairments in daily life activities than more time-consuming and costly traditional EF tests. The BDEFS-CA offers an ecologically valid snapshot of the capacities involved in time management, organization and problem solving, self-restraint, self-motivation, and self-regulation of emotions. Two parent-report forms are included: a long form (10-15 minutes) and a short form (3-5 minutes). There is also a short clinical interview form based on the short-form rating scale, for use in unusual circumstances where a parent is unable to complete a rating scale. Special features include an ADHD risk index in the long form. Complete instructions for scoring and interpreting the scale are provided.
