Michael S. Schneider

A Beginner's Guide to Constructing the Universe: Mathematical Archetypes of Nature, Art, and Science Michael S. Schneider

The Universe May Be a Mystery, But It's No Secret

Michael Schneider leads us on a spectacular, lavishly illustrated journey along the numbers one through ten to explore the mathematical principles made visible in flowers, shells, crystals, plants, and the human body, expressed in the symbolic language of folk sayings and fairy tales, myth and religion, art and architecture. This is a new view of mathematics, not the one we learned at school but a comprehensive guide to the patterns that recur through the universe and underlie human affairs. *A Beginner's Guide to Constructing, the Universe* shows you:

1. Why cans, pizza, and manhole covers are round.
2. Why one and two weren't considered numbers by the ancient Greeks.
3. Why squares show up so often in goddess art and board games.
4. What property makes the spiral the most widespread shape in nature, from embryos and hair curls to hurricanes and galaxies.
5. How the human body shares the design of a bean plant and the solar system.
6. How a snowflake is like Stonehenge, and a beehive like a calendar.
7. How our ten fingers hold the secrets of both a lobster and a cathedral.
8. And much more.

From reader reviews:

Amanda Mathis:

What do you think of book? It is just for students as they are still students or the item for all people in the world, the particular best subject for that? Merely you can be answered for that issue above. Every person has several personality and hobby for every single other. Don't to be pressured someone or something that they don't would like do that. You must know how great and also important the book A Beginner's Guide to Constructing the Universe: Mathematical Archetypes of Nature, Art, and Science. All type of book is it possible to see on many resources. You can look for the internet sources or other social media.

John Lee:

Reading a guide tends to be new life style on this era globalization. With studying you can get a lot of information that could give you benefit in your life. Together with book everyone in this world can share their idea. Textbooks can also inspire a lot of people. Plenty of author can inspire their own reader with their story or perhaps their experience. Not only the storyline that share in the publications. But also they write about advantage about something that you need illustration. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors on this planet always try to improve their expertise in writing, they also doing some study before they write on their book. One of them is this A Beginner's Guide to Constructing the Universe: Mathematical Archetypes of Nature, Art, and Science.

Margaret Coleman:

A lot of people always spent their free time to vacation or even go to the outside with them household or their friend. Are you aware? Many a lot of people spent they free time just watching TV, or playing video games all day long. If you need to try to find a new activity that's look different you can read the book. It is really fun for you personally. If you enjoy the book which you read you can spent 24 hours a day to reading a publication. The book A Beginner's Guide to Constructing the Universe: Mathematical Archetypes of Nature, Art, and Science it is very good to read. There are a lot of people who recommended this book. We were holding enjoying reading this book. Should you did not have enough space to create this book you can buy typically the e-book. You can m0ore simply to read this book from your smart phone. The price is not too costly but this book features high quality.

Courtney O'Donnell:

Playing with family in the park, coming to see the ocean world or hanging out with buddies is thing that usually you might have done when you have spare time, and then why you don't try factor that really opposite from that. One activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love A Beginner's Guide to Constructing the Universe: Mathematical Archetypes of Nature, Art, and Science, you could enjoy both. It is great

combination right, you still need to miss it? What kind of hang type is it? Oh come on its mind hangout guys. What? Still don't obtain it, oh come on its known as reading friends.
