Dynamics of Fluids in Porous Media (Dover Civil and Mechanical Engineering)

Jacob Bear

Dynamics of Fluids in Porous Media (Dover Civil and Mechanical Engineering) Jacob Bear

This classic work by one of the world's foremost hydrologists presents a topic encountered in the many fields of science and engineering where flow through porous media plays a fundamental role. It is the standard work in the field, designed primarily for advanced undergraduate and graduate students of ground water hydrology, soil mechanics, soil physics, drainage and irrigation engineering, and petroleum and chemical engineering. It is highly recommended as well for scientists and engineers already working in these fields. Throughout this generously illustrated, richly detailed study, which includes a valuable section of exercises and answers, the emphasis is on understanding the phenomena occurring in porous media and on their macroscopic description. The book's chapter titles reveal its comprehensive coverage: Introduction, Fluids and Porous Matrix Properties, Pressures and Piezometric Head, The Fundamental Fluid Transport Equations in Porous Media, The Equation of Motion of a Homogeneous Fluid, Continuity and Conservation Equations for a Homogeneous Fluid, Solving Boundary and Initial Value Problems, Unconfined Flow and the Dupuit Approximation, Flow of Immiscible Fluids, Hydrodynamic Dispersion, and Models and Analogs. "Systematic and comprehensive . . . a book that satisfies the highest standards of excellence. . . . Will undoubtedly become the standard reference in this field." — R. Allen Freeze, IBM Thomas J. Watson Research Center, Water Resources Research.

From reader reviews:

Sandy Gonsalves:

People live in this new morning of lifestyle always try and and must have the spare time or they will get great deal of stress from both lifestyle and work. So , when we ask do people have free time, we will say absolutely of course. People is human not really a robot. Then we consult again, what kind of activity do you possess when the spare time coming to you actually of course your answer will unlimited right. Then ever try this one, reading books. It can be your alternative in spending your spare time, the particular book you have read is definitely Dynamics of Fluids in Porous Media (Dover Civil and Mechanical Engineering).

Edward Foland:

This Dynamics of Fluids in Porous Media (Dover Civil and Mechanical Engineering) is great publication for you because the content which can be full of information for you who also always deal with world and possess to make decision every minute. This specific book reveal it facts accurately using great plan word or we can say no rambling sentences in it. So if you are read this hurriedly you can have whole information in it. Doesn't mean it only gives you straight forward sentences but challenging core information with wonderful delivering sentences. Having Dynamics of Fluids in Porous Media (Dover Civil and Mechanical Engineering) in your hand like keeping the world in your arm, facts in it is not ridiculous a single. We can say that no reserve that offer you world within ten or fifteen minute right but this guide already do that. So , this can be good reading book. Hello Mr. and Mrs. stressful do you still doubt in which?

Eric Hempel:

In this age globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of personal references to get information example: internet, newspaper, book, and soon. You can view that now, a lot of publisher this print many kinds of book. The particular book that recommended for you is Dynamics of Fluids in Porous Media (Dover Civil and Mechanical Engineering) this reserve consist a lot of the information from the condition of this world now. This specific book was represented just how can the world has grown up. The terminology styles that writer require to explain it is easy to understand. The particular writer made some research when he makes this book. Here is why this book appropriate all of you.

Johnny Relyea:

As a scholar exactly feel bored to reading. If their teacher expected them to go to the library or to make summary for some e-book, they are complained. Just very little students that has reading's soul or real their pastime. They just do what the instructor want, like asked to the library. They go to right now there but nothing reading significantly. Any students feel that studying is not important, boring as well as can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important for yourself. As we know

that on this period, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore , this Dynamics of Fluids in Porous Media (Dover Civil and Mechanical Engineering) can make you experience more interested to read.
