Current Trends in Concrete Fracture Research

From time to time the International Journal of Fracture has presented matters thought to be of special interest to its readers. The last special topic review was presented by Drs W.G. Knauss and A.J. Rosakis as Guest Editors in four issues, January-April 1990, under the general title of Non Linear Fracture. It contained sections on damage mechanisms, interfaces and creep, time dependence, and continuum plasticity insofar as they affect the mechanisms of the fracture process. Continuing this policy, which is consistent with our stated objectives, the two September issues deal with the behavior of concrete and cementitious materials during fracture initiation and propagation. We hope that the ensuing state-of-the-art review will yield another instructive and timely product which readers will find useful. To assist us in presenting this subject, we have prevailed upon a well-known international expert in concrete behavior, Dr. Z.P. Bazant, Walter P. Murphy Professor of Civil Engineering, of Northwestern University to act as Guest Editor. On behalf of the editors and publishers, I wish to thank Professor Bazant and his invited authors for undertaking this special effort. M.L. WILLIAMS Pittsburgh, Pennsylvania Editor-in-Chief September 1991 International Journal of Fracture 51: ix-xv, 1991. Z.P. Bazant (ed.), Current Trends in Concrete Fracture Research.

Cynthia Ncaise:

As a university student, I exactly feel bored to help with reading. If their teacher expected them to go to the library as well as to make a summary for some e-book, they are complained. Just very few students that have reading's heart or real passion. They just do what the instructor wants, like asked to go to the library. They go there but nothing is read significantly. Any student feels that examining is not important, boring and also can't see colorful photos on there. Yeah, it is to be complicated. Books are very important for yourself. As we know that on this age, many ways to get whatever we would like. Likewise, word says, ways to reach Chinese's country. Therefore, this Current Trends in Concrete Fracture Research can make you more interested to read.
