Few would deny that we are entering a period of great change. Our environment is collapsing. Social disruption abounds. All around, it seems, we are experiencing breakdown. But out of this chaos comes the opportunity for breakthrough-the opportunity to reimagine our future.

In *Dreaming the Future*, Kenny Ausubel leads us into that possible new world and introduces us to the thinkers and doers who are-sometimes quietly, sometimes not-leading what he calls "a revolution from the heart of nature and the human heart."

In a collection of short, witty, poignant, even humorous essays, Ausubel tracks the big ideas, emerging trends, and game-changing developments of our time. He guides us through our watershed moment, showing how it's possible to emerge from a world where corporations are citizens, the gap between rich and poor is cavernous, and biodiversity and the climate are under assault and create a world where we take our cues from nature and focus on justice, equity, diversity, democracy, and peace.

Even those steeped in the realities of a world gone wrong and efforts to right it will find refreshing, even surprising, perspectives in *Dreaming the Future*. It will come as no surprise to readers that Ausubel is cofounder of Bioneers-which foreword author David W. Orr describes as "one part global salon...one part catalytic organization."
