The loss or lack of interest in sex is a common complaint in sex therapy. Organized around in-depth case presentations, this book showcases effective treatment approaches for individuals and couples. The contributors are highly skilled therapists who explore the complexity of sexual desire problems and offer detailed descriptions of clinical techniques. The book illuminates the complex interplay of biological, psychological, interpersonal, contextual, and cultural factors that need to be considered in assessment and intervention. Concise chapter introductions by editor Sandra R. Leiblum summarize key themes and provide a context for understanding each author's approach.
