The professional programmer's Deitel® guide to procedural programming in C through 130 working code examples

Written for programmers with a background in high-level language programming, this book applies the Deitel signature **live-code approach** to teaching the C language and the **C Standard Library**. The book presents the concepts in the context of fully tested programs, complete with syntax shading, code highlighting, code walkthroughs and program outputs. The book features approximately **5,000 lines of proven C code** and hundreds of savvy tips that will help you build robust applications.
