Logistic Regression: A Self-Learning Text (Statistics for Biology and Health)

David G. Kleinbaum, Mitchel Klein

Logistic Regression: A Self-Learning Text (Statistics for Biology and Health) David G. Kleinbaum, Mitchel Klein

This is the third edition of this text on logistic regression methods, originally published in 1994, with its second edition published in 2002. As in the first two editions, each chapter contains a presentation of its topic in “lecture book” format together with objectives, an outline, key formulae, practice exercises, and a test. The “lecture book” has a sequence of illustrations, formulae, or summary statements in the left column of each page and a script (i. e. , text) in the right column. This format allows you to read the script in conjunction with the illustrations and formulae that highlight the main points, formulae, or examples being presented. This third edition has expanded the second edition by adding three new chapters and a modified computer appendix. We have also expanded our overview of modeling strategy guidelines in Chap. 6 to consider causal diagrams. The three new chapters are as follows: Chapter 8: Additional Modeling Strategy Issues Chapter 9: Assessing Goodness of Fit for Logistic Regression Chapter 10: Assessing Discriminatory Performance of a Binary Logistic Model: ROC Curves In adding these three chapters, we have moved Chaps. 8 through 13 from the second edition to follow the new chapters, so that these previous chapters have been renumbered as Chaps. 11–16 in this third edition.

From reader reviews:

James Ponce:

Do you have favorite book? In case you have, what is your favorite's book? E-book is very important thing for us to understand everything in the world. Each e-book has different aim as well as goal; it means that reserve has different type. Some people feel enjoy to spend their the perfect time to read a book. They are reading whatever they get because their hobby is definitely reading a book. Consider the person who don't like looking at a book? Sometime, man feel need book if they found difficult problem or exercise. Well, probably you will require this Logistic Regression: A Self-Learning Text (Statistics for Biology and Health).

Lena Drew:

What do you think about book? It is just for students since they're still students or that for all people in the world, what best subject for that? Just simply you can be answered for that problem above. Every person has several personality and hobby for every single other. Don't to be obligated someone or something that they don't would like do that. You must know how great and important the book Logistic Regression: A Self-Learning Text (Statistics for Biology and Health). All type of book would you see on many options. You can look for the internet options or other social media.

James Brown:

As people who live in often the modest era should be upgrade about what going on or facts even knowledge to make them keep up with the era that is always change and advance. Some of you maybe will certainly update themselves by examining books. It is a good choice in your case but the problems coming to you actually is you don't know which one you should start with. This Logistic Regression: A Self-Learning Text (Statistics for Biology and Health) is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and need in this era.

Kevin Williams:

The particular book Logistic Regression: A Self-Learning Text (Statistics for Biology and Health) will bring that you the new experience of reading some sort of book. The author style to clarify the idea is very unique. If you try to find new book you just read, this book very suitable to you. The book Logistic Regression: A Self-Learning Text (Statistics for Biology and Health) is much recommended to you to learn. You can also get the e-book from official web site, so you can quickly to read the book.
