Robust Control of Linear Systems Subject to Uncertain Time-Varying Parameters (Lecture Notes in Control and Information Sciences) Francesco Amato

The last thirty years have witnessed an enormous effort in the field of robust control of dynamical systems. The main objective of this book is that of presenting, in a unified framework, the main results appeared in the literature on this topic, with particular reference to the robust stability problem for linear systems subject to time-varying uncertainties. The book mainly focuses on those problems for which a definitive solution has been found; indeed most of the results we shall present are given in the form of necessary and sufficient conditions involving the feasibility of Linear Matrix Inequalities based problems. For self-containedness purposes, most of the results provided in the book are proven. We have tried to maintain the development of the proofs as simple as possible, without sacrificing the mathematical rigor. Some parts of the book (especially those contained in Chaps. 2, 3 and 5) can be taught in advanced control courses; however this work is mainly devoted to both researchers in the field of systems and control theory and engineers working in industries which want to apply the methodologies presented in the book to practical control problems. To this regard, as the various results are derived, they are immediately reinforced with real world examples.

From reader reviews:

David Pell:

The publication with title Robust Control of Linear Systems Subject to Uncertain Time-Varying Parameters (Lecture Notes in Control and Information Sciences) has lot of information that you can discover it. You can get a lot of benefit after read this book. That book exist new knowledge the information that exist in this guide represented the condition of the world now. That is important to you to understand how the improvement of the world. This kind of book will bring you in new era of the the positive effect. You can read the e-book on your own smart phone, so you can read the item anywhere you want.

Eduardo Ford:

People live in this new day time of lifestyle always make an effort to and must have the spare time or they will get lot of stress from both lifestyle and work. So , whenever we ask do people have free time, we will say absolutely indeed. People is human not a robot. Then we question again, what kind of activity are you experiencing when the spare time coming to a person of course your answer can unlimited right. Then do you ever try this one, reading ebooks. It can be your alternative throughout spending your spare time, typically the book you have read is Robust Control of Linear Systems Subject to Uncertain Time-Varying Parameters (Lecture Notes in Control and Information Sciences).

Robert Knight:

Playing with family in a very park, coming to see the sea world or hanging out with close friends is thing that usually you could have done when you have spare time, in that case why you don't try point that really opposite from that. Just one activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Robust Control of Linear Systems Subject to Uncertain Time-Varying Parameters (Lecture Notes in Control and Information Sciences), you can enjoy both. It is fine combination right, you still need to miss it? What kind of hang type is it? Oh occur its mind hangout fellas. What? Still don't have it, oh come on its referred to as reading friends.

Cleora Yarbro:

Don't be worry for anyone who is afraid that this book will filled the space in your house, you might have it in e-book technique, more simple and reachable. This particular Robust Control of Linear Systems Subject to Uncertain Time-Varying Parameters (Lecture Notes in Control and Information Sciences) can give you a lot of pals because by you taking a look at this one book you have thing that they don't and make you more like an interesting person. This particular book can be one of one step for you to get success. This reserve offer you information that might be your friend doesn't recognize, by knowing more than different make you to be great folks. So , why hesitate? Let us have Robust Control of Linear Systems Subject to Uncertain Time-Varying Parameters (Lecture Notes in Control and Information Sciences).
